

# WEATHERPROOF SERIES

## *3-Dimensional Speaker Options*

### FEATURES

---

- Acoustix transparent hyperbolic waterproof speaker grill cloth
- Stainless steel speaker grill
- ½" composite material for speaker box enclosure material or fiberglass gel coating, both with polyurethane top coating
- Polyurethane sealant on all internal joints and seams
- Neoprene gasket on amplifier modules
- Removal of pole socket
- Removal of hole perforations on speaker grill top and sides to stop water pooling in speaker grill holes
- IP65 rated True1 mains connector
- IP65 rated network and XLR connectors
- Waterproof dope coating for 5" woofers
- Silk soft dome tweeters inherently water-proof
- Stainless steel internal rigging brackets
- Optional 24V or 48V DC powering options for low voltage applications
- Allows for exterior use of the speakers, with no penalty to normal warranty terms. Normal warranty terms apply.

Note: Bolts for rigging must use a gasket and be installed with side or bottom rigging points.
